

Specification for Easy Peel Film

Product: Easy Peel Lamination Film

Catalog Number: 5499

Product Description: Easy peel films are multi-layer flexible materials designed to allow controlled and clean separation between sealed layers. The films provide reliable sealing during packaging while enabling easy opening without tearing or damaging the pack. Used for food and medical packaging, offering convenience, controlled peel strength, and consistent performance.

Thickness: 30-200μ

Width: Can change accordingly per customer request

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Coefficient of Friction – static and dynamic inside/inside layer	-	0.2	0.3	ISO 8195 or ASTM -D1894
Seal Temperature	°C	120	145	Internal
Light Transmittance	nm	40	60	UV-VIS
