

TECHNICAL PRODUCT INFORMATION

Product: Lamination film- Frozen Food

Catalog Number:5121

Product Description: Frozen food lamination films are multi-layer flexible materials designed to maintain performance at low temperatures while protecting products from moisture, contamination, and mechanical damage. The films provide reliable sealing, flexibility, and resistance to brittleness under freezing conditions, ensuring product integrity during storage and transportation. Used for frozen food packaging such as vegetables, meat, and ready meals, offering durability, protection, and extended shelf life.

Thickness:65-100μ

Width: Can change accordingly per customer request

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Light Transmittance	nm	30	60	UV-VIS
Coefficient of Friction – static and dynamic outside/inside layer	-	0.2	0.3	ISO 8195 or ASTM -D1894
Seal Temperature [°C]	°C	110	120	Internal
Anti-Static	V	10	12	Internal
