

TECHNICAL PRODUCT INFORMATION

Product: Lamination Film- Anti Fog

Catalog Number:5379

Product Description: Anti-fog lamination films are multi-layer flexible materials designed to prevent condensation and maintain clear visibility under varying temperature and humidity conditions. The films provide reliable sealing, moisture control, and anti-fog performance, ensuring product clarity and protection. Used for fresh food packaging such as produce, meat, and ready meals, offering improved visibility, freshness, and product presentation.

Thickness: 30-100μ

Width: Can change accordingly per customer request

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Coefficient of Friction – static and dynamic outside/inside layer	-	0.25	0.45	ISO 8195 or ASTM -D1894
Seal Temperature	°C	110	135	Internal
Anti-Static	V	10	12	Internal
Anti Fog (Hot/Cold)	-	Visual		ICI-Method
