

TECHNICAL PRODUCT INFORMATION

Product: Lamination Film- Retort

Catalog Number:5511

Product Description: Lamination Retort films are high-performance multi-layer materials designed to withstand high-temperature sterilization processes while maintaining clarity and structural integrity. The films provide excellent heat resistance, strong sealing performance, and resistance to pressure during retort conditions. Used for sterilized food products, ready meals, and liquid packaging, offering durability, product visibility, and extended shelf life.

Thickness: 30-150μ

Width: Can change accordingly per customer request

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Coefficient of Friction – static and dynamic outside/inside layer	-	0.25	0.45	ISO 8195 or ASTM -D1894
Seal Temperature	°C	110	135	Internal
Anti-Static	V	10	12	Internal
