

TECHNICAL PRODUCT INFORMATION

Product: Lamination Film – PVC

Catalog Number:5030

Product Description: PVC lamination films are flexible materials designed for applications requiring heat resistance, durability, and surface protection. The films provide good thermal stability, chemical resistance, and strong adhesion when laminated onto substrates. Used for industrial, printing, and protective applications, offering durability, moisture resistance, and enhanced surface performance.

Thickness: 30-90μ

Width: Can change accordingly per customer request

Lamination films specification:

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Easy peel to PVC	N	4	8	Internal
Coefficient of Friction – static and dynamic inside/outside layer*	-	0.2	0.3	ISO 8195 or ASTM -D1894
Seal Temperature [°C]	°C	100	145	Internal

* Can change accordingly per customer request.
