

TECHNICAL PRODUCT INFORMATION

Product: Lamination film- Hot Lamination

Catalog Number:3099

Product Description: Hot fill lamination films are multi-layer flexible materials designed to withstand elevated filling temperatures while maintaining strong sealing and structural integrity. The films provide resistance to heat, liquids, and deformation, ensuring reliable performance during filling, storage, and transportation of hot liquid products such as sauces, dairy, and beverages.

Thickness: 30-120 μ

Width: Can change accordingly per customer request

Lamination films specification:

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Haze	%	30	40	UV-VIS
Coefficient of Friction – static and dynamic inside/inside layer*	-	0.2	0.3	ISO 8195 or ASTM -D1894
Seal Temperature [°C]	°C	110	135	Internal

* Can change accordingly per customer request.
