

TECHNICAL PRODUCT INFORMATION

Product: Lamination film- Straight Line Tear

Catalog Number:5302

Product Description: Straight line tear films are flexible materials designed to provide controlled, linear tearing along a defined direction without deviation. The films ensure clean and predictable opening while maintaining strong sealing and package integrity during handling. Used for food, consumer, and industrial packaging, offering precise tear performance, convenience, and consistent opening behavior.

Thickness:50-105 μ

Width: Can change accordingly per customer request

Lamination films specification:

Mechanical and physical properties:

Property	Units	Value		Test Method
		Min	Max	
Haze	nm	40	60	UV-VIS
Coefficient of Friction – static and dynamic inside/inside layer*	-	0.2	0.3	ISO 8195 or ASTM -D1894
Seal Temperature [°C]	°C	110	120	Internal

* Can change accordingly per customer request.
